**RE: Free Product Summary Report for Calendar Year 2008 for Sites 425, 1343, 1585, and 1586, Naval Station Mayport, USEPA ID #FL9 170 024 260, Mayport, Florida (Tetra Tech NUS, Inc., May 28, 2009)**

Dear Ms. Washington:

I have reviewed the subject document dated May 28, 2009 (received May 28, 2009). FDEP concurs with the conclusion and recommendations presented in the report. The use of the petroleum sorbent materials and the manual free product removal efforts have been successful at removing free product at these sites. Based on the most recent information, Tetra Tech should continue to measure for and recover free product at these sites if present, and to monitor the sorbent socks. Tetra Tech should document the color of sorbent material in the sorbent socks when exchanging with new sorbent material.

Thank you for the opportunity to review this document. If you require additional clarification or other assistance please feel free to contact me at 850/245-8999.

Sincerely,

John Winters, P.G.  
Remedial Project Manager
